

"More Time for Patients, Thanks to Ottobots"

AUTONOMOUS ROBOTS FOR HEALTHCARE

Ottobots in Healthcare

They transport medications, lab samples, and supplies safely across indoor/outdoor hospital environments, navigating elevators and doors seamlessly. Equipped with AI, sensors, and secure compartments, they maintain sample integrity with temperature control and biohazard features while freeing nurses for patient care—cutting non-clinical tasks by up to 40%.

Integrated Infrastructure

Ottobots can integrate with Automated doors, elevators and building management systems for seamless indoor & outdoor operations

Unattended deliveries

Ottobots integrated with smart mailbox solutions to automated end to end deliveries such that it feels like teleportation.

Secure: chain of custody

Ottobots come with secure payload bays that can be accessed after authentication via OTP, badge readers etc.

Configurable payloads

Customize Ottobots according to your needs. Shuttle medicine, lab samples, telemetry equipment, food trays etc in a secure and efficient manner

Boost nursing performance with cutting-edge robotics. Schedule your consultation today and transform your operations!
